

Working for sustainable transport: implications for labour & livelihoods

Dr. Edmundo Werna

DECENT WORK

A better world starts here.

Greening the transport system & labour

1- better access to the workforce

2- working conditions

3- employment generation

example Ile de France (CO2 emission scenarios):

1. Increase in car traffic and 13% in congestion:
33,000 jobs in transportation
2. 10% reduction in traffic and 35% increase in
public transport: 50,000 new jobs in the sector

Challenges

- . low pay, working hours
- . occupational health and safety: kidney disorders, urinary tract infections, fatigue, working time, stress, repetitive tasks, sleep deprivation, sedentary lifestyle, obesity, substance use and abuse
- . violence
- . informality

Local Practices

- ❖ ***Cooperatives***: new bus system
Kampala
- ❖ ***Partnership with trade union***: BTR
Lagos
- ❖ ***Social dialogue***: matatus Kenya

Issues for discussion

- Application of standards
- Regulation
- Formal-informal sector cooperation

Employment change

EFFECT	EXAMPLES
New job creation	transport where there was none
Elimination	reduction of the fleet, telecommuting
Substitution	van driver → bus driver
Transformation	from driver to transport manager

TRABALHO DECENTE e DESENVOLVIMENTO SUSTENTÁVEL

26 e 27 de Maio de 2014
São Paulo • SP

PREFEITURA DE SÃO PAULO

an integrated approach at the municipal level
